

**Group number: 7**

**Team members:** Eddie Cazares, Daphne Lopez, Mariana Hermida Rojas, Linh Vu

**Name of project:** WanderWise

**Dependencies:** Xcode 15.0.1, Swift 5

**Special Instructions:**

- Use an iPhone 15 Pro Simulator
  - Do not change to orientation to landscape
- Test account with multiple trips already added:
  - Email: mariana.02.hr@gmail.com
  - Password: password

Feature	Description	Release Planned	Release Actual	Deviations (if any)	Who/Percent age Worked On
UI	Colors, buttons, & navigation	Final	Final	None	Daphne (25%) Eddie (25%) Mariana (25%) Linh (25%)
Log-in/Sign-up	Allow users to create an account and sign in	Alpha	Beta	None	Linh (80%) Mariana (10%) Daphne (10%)
Home Screen	Two table views showing past and upcoming trips	Alpha	Alpha	None	Mariana (95%) Eddie (5%) (Delete trip functionality and helped with logic for "ongoing" trip detection)
Create Trip	Be able to create a new trip	Alpha	Beta	None	Eddie (80%) Daphne (20%)
AI Itinerary Generation	Generate an itinerary from the user inputs	Beta	Final	Event type options are not connected to the AI prompt so they do	Daphne (70%) Linh (30%)

				not affect the generation of Trips. Places API unused in trip generation so generated locations may not exist.	
Itinerary	Show itinerary as a table view with sections for each day	Alpha	Alpha	None	Daphne (100%)
Edit Itinerary	Show the itinerary with options to edit, delete, or add events.	Alpha	Alpha	None	Eddie (5%) Daphne (95%)
Edit/Add Event	Be able to save edited, added, or deleted events	Final	Beta	When adding a new event, it is placed at the end of the day, not sorted by time	Eddie (100%)
AI Virtual Tour Guide	AI Tour guide you can chat with that has the context of your trip	Beta	Beta	Message bubbles don't look as we intended	Daphne (60%) Linh (40%)
Global Map	Show a global map of all events - past, ongoing, and upcoming.	Final	Final	None	Mariana (100%)
Directions	Open Google Maps to the selected destination from the event details	Final	Final	None	Mariana (100%)

	VC				
User Settings	Users can see and edit their name, username, profile picture, and notification preferences	Beta	Beta (Saving the profile picture was completed by Final but everything else by Beta)	None	Mariana (65%) Eddie (30%) Daphne (5%)
Timely Notifications	Send a notification 10 minutes before the start of an event	Beta	Final	None	Eddie (100%)
Backend	Trips, Events, Days, Users are modeled as collections in our database for persistence. User profile pictures are stored using Firebase storage.	Alpha	Beta	None	Eddie (85%) Mariana (15%) added initial UserProfile collection
